## Signal Jammers around you

Mobile phone jammers have now affected every aspect of our lives. It can be said that people's lives are inseparable from smartphone jammer. The Smart phone is not only a payment tool, but also an important tool for communication, information browsing, messaging, entertainment and so on. Modern people can go without food for a day, but they cannot leave their smart phones for a moment, and cell phones have become the spiritual opium of modern people. That's why we firmly believe that almost everyone should own a cell phone signal jammer, an essential must-have gadget for everyday life.

In fact, there are many types of frequency jammers, such as mobile phone blockers, Wifi jammers, GPS jammers,... They are used in different places, and their names are different according to their functions. But one thing is for sure, it can help those who need it address privacy and security concerns. If you are careful enough about life, you will find that *signal jamers* have been widely used in various places around us.

## 1. Educational institutions & Examination centers

The use of mobile phones is strictly prohibited in many places in educational institutions and test centers, but it is not uncommon for candidates to cheat using various communication devices in the test room every year. In the face of sudden cell phone ringing or vibration in the classroom, teachers and students are distracted, affecting the progress of teaching. **Signal blockers** must be used to prevent such events from happening.

## 2. Prisons and Correctional Centers

The supervision of cell phones in prisons and correctional centers cannot be taken lightly at any time. In order to allow prisoners to smoothly reform through labor and prevent prisoners from communicating with the outside world through smuggling cell phones, prisons need high power **signal jamming device**. Create a signal shielding area with no dead spots.

## 3. Conference room

During some important meetings, employees are often asked to turn on their mobile phones in airplane mode or meeting mode, but there are always some "alternatives" who still send text messages and surf the Internet there, wasting everyone's precious meeting time. In order to curb this phenomenon, install **frequency blockers** is a good choice!

## 4. R&D Centers and Laboratories

The R&D center and laboratory are the core of the company's technology. In order to prevent the leakage of R&D data and test data, and prevent hackers from stealing data through wifi or local area network. Using a powerful internet jammer to create a signal exclusion zone can effectively protect the network and data security.

## 5. Cinemas and theatres

Movie theaters and theaters should be places where we can quietly appreciate art and cultivate our sentiments, so that we can enjoy a pleasant leisure time, but there are always some rude people who don't know how to keep quiet. At this point, **signal blocker device** can help cinemas and theaters protect the legitimate rights and interests of their customers

### 6. Libraries and lounges

When you are immersed in the vast sea of books, I think one of the things you hate the most is to be interrupted reading suddenly, just like someone who is in deep sleep is suddenly awakened. Libraries and lounges are places that need quiet and do not want to be disturbed, and choosing a mobile phone **jammer device** can avoid being disturbed!
